1992 - Porsche 911 / 964 Cup

Make:	Porsche
Model:	911 / 964 Cup
Year:	1992
Location:	Australia
Type:	Coupé
Chassis Number:	WP0ZZZ96ZNS498103
Drive:	LHD
Road Registered:	No
Competition Ready:	Yes
FIA HTP:	No
Interior Color:	White
Exterior Color:	Red and White
Price:	EUR 230.000,-

Key Features

- One of just 150 2nd generation 964 Cup cars built
- Entered by Roock Racing for the 1993 Carrera Cup and Supercup
- Raced very successfully by Mike Hezemans with multiple podium finishes
- In immaculate condition fresh from a bare-metal restoration
- Ideal for show or track

Description

We have the pleasure to offer this stunning 1992 second generation Porsche 964 Cup car for sale.

Porsche introduced the 964-based Carrera Cup in 1990 as a single-model "Spec-racer" championship to replace the successful 944 Cup series. Based on the Porsche 964, the 964 Cup was the 1990 racing version for this new Carrera Cup championship. In addition to an increase in output by 11 kW to 195 kW (265 hp) the 964 Cup had a welded Wilfried Matter roll-cage, a single Recaro race seat with six point safety harness and a fire-suppression system. The suspension was stiffened with shorter springs, Bilstein gas-filled shocks and fully adjustable anti-roll bars front and rear, a modified chassis set-up and the ground clearance was 55 mm lower than on the standard version. To reduce weight: the interior and the sound-proofing material was removed. The gear ratios were modified and it had non power-steering with a faster ratio, a catalytic converter and an anti-lock braking system (ABS). In 1992, the 964 Cup had a major revision whereby it now had the body from the 964 RS and the engine produced 202 kW (275 hp). Another major change was that the ABS could be switched off in the event of emergency braking or whilst the car was going backwards. The car now had 18 inch magnesium rims which replaced the aluminium rims and the car was lowered by a further 20 mm. The normally aspirated air-cooled six-cylinder engines were selected by factory race engineers for equal output. They ran without air filters, the stock dual-mass flywheel was replaced with a single disc, and the electronic engine control units sealed to prevent tampering.

The Carrera Cup race series was staged nationally, regionally, and then internationally, often running as support events for Formula 1. They proved quite popular and successful.

Technical data

Model	Porsche 964 Cup	
	1990–1991	1992–1993
Year		
Engine	3,600 cc, six-cylinder, boxer engine	3,600 cc, six-cylinder, boxer engine
Power	195 kW (265 PS) at 6100/min	202 kW (275 PS) at 6100/min
Torque	310 Nm at 4800/min	314 Nm at 4800/min
Weight	1120 kg	1120 kg

Our car, a 2nd generation 964 Cup car with chassis number WP0ZZZ96ZNS498103, was one of two cars entered by the German Roock Racing team in both the 1993 German Carrera Cup as well as the international Porsche Supercup where it was driven by no other than Dutchman Mike Hezemans. Mike immediately set off with a win at the 1st race at Zolder and had many other

podium finishes in both series including the Spa and Nurburgring 24hrs races. The car competed in 6 of the 10 races in the 1993 Carrera Cup achieving 1 win, 3 podiums and 1 pole position which resulted in Hezemans finishing 5th in the championship. He also raced in 7 of the 9 Super Cup races with 1 pole and 1 podium and a 6th position for the championship season. All 13 races are listed in the car's original Wagenpass which accompanies the car.

After the 1993 race season, the car was bought by renown kiwi racer kiwi Owen Evans who raced the car in New Zealand after which it was owned by Kevin Cantwell (NZ) who then sold the car to its current owner in 2016. A full bare-metal-restoration was started including a rebuild of the engine (on an earlier 964 case), gearbox (G50 with new input shaft and CWP) and all other mechanicals with great attention to detail and period correctness on all fronts. The car is offered for sale fresh from restoration and with zero hours. Evidence of its as-new condition can be seen in the video (see above link).

Spares that come with the car are:

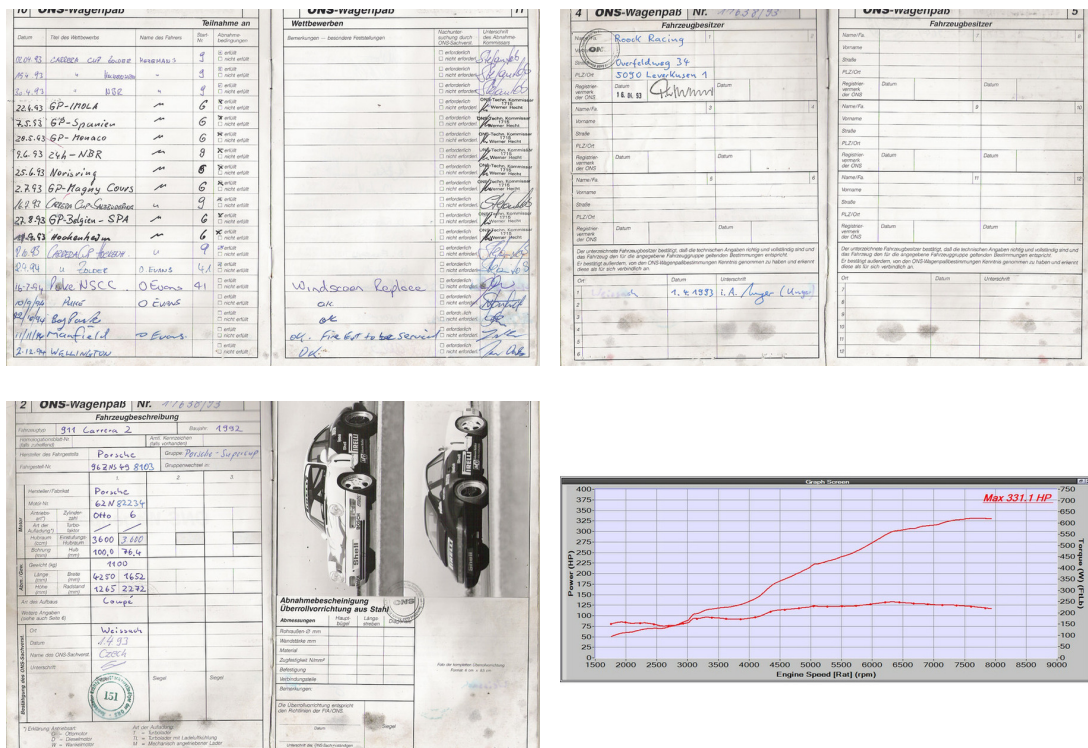

- the original manifold should you want to change it back to original (the car now runs on GT3 plenum chambers/inlet manifold with multiple throttle intake)
- original Bosch ECU (the car now runs on a Motec M84)
- brand new set of red and white wheels as on the car

This stunning and very 90ies livered Porsche 964 Cup offers a rare opportunity to the serious Porsche collector for show or enjoyment on the track. An opportunity not to be missed!
